POLYMER COATED STEEL PIPE, PIPE ARCH & REPAIR MATERIALS

| PRODUCT SOURCE CODE | PRODUCT | SOURCE | FABRICATOR (APPROVED SIZES) | SYSTEM |
|--|---------|--------|-----------------------------|--------|
| (No Currently Approved Sources) | | | | |

REFERENCE:

2000 DOTD Standard Specifications, Subsection 1007.07 (Metric/English)
DOTD Maintenance Specifications, MS 192-004

NOTE:

All materials, regardless of prior approval, shall be sampled by the Construction Materials Unit for testing for conformance to specification requirements of the pipe, pipe arch and repair materials and to ensure that the submitted material is identical to the original samples.

Project acceptance of manufactured polymer coated corrugated steel pipe shall be in accordance with the Materials Sampling Manual. Repairs of polymer coated steel pipe and pipe arch shall utilize repair materials as listed on the QPL which have been sampled in accordance with the Materials Sampling Manual, Sections 705 and 811.

Any deviation in performance, manufacturing process or materials may result in removal of the product from the approved list.

No information contained in this list is to be used for promotional purposes.
